

## MODLIGHT®70 PRO

IO-LINK INTEGRATION – NO SOFTWARE REQUIRED

**Now available from Murrelektronik – the Modlight70 Pro signal tower with an IO-Link interface. This IO-Link device is quickly and easily integrated into and installation. No configuration required!**

Murrelektronik's Modlight Pro LED signal towers are designed with ease in mind. There are five colors that can be combined as needed. There is also a buzzer element available for those installations needing an audible signal.

- Easy to Configure – No IODD or software needed
- Unshielded M12 cable connection
- Extremely flexible – choose from 5 LEDs and a buzzer module

The Modlight70 Pro with IO-Link interface is easily integrated into an installation with a low cost 3-pole unshielded M12 cable. Integration of the signal tower is simple. It can be configured by an IO-Link device tool if you are already using one but it does not require an IODD or special software. Additionally, the classic permanent light can be changed into one of six different flashes if needed.

### IO-LINK...

shortens commissioning times!

reduces costs!

increases the productivity of machines!

revolutionizes service and maintenance!
